Extensive service history to include:

Annual DOT Inspections

Generator serviced annually and runs very well.

Newer (2023) DOT compliant steer tires

2024 Brake Inspections completed.

Current pump test 10/8/2024 – PASSED all phases.

Some updated LED lighting to reduce electrical load

Foam system inspected annually / Foam cell flushed in 2023.

Engine is ready to be immediately placed in service to new owner.

This engine is being sold solely due to other engine replacements which will better service areas with poor apparatus access.

> With an on-board foam system, your firefighting will use the water more efficiently. Adding foam to a fire can help reduce the total water needed to extinguish the fire and reduce the damage that can be caused to property by excess water usage on a fire scene.

> With under 17,000 miles, this fire truck comes from a

department that knows 'pride in ownership'. It's been taken care of over its life and will continue to be a great apparatus to respond to emergency calls in your fire department. It has served a small community during its life with most of it's mileage and hours spent in training functions. It has served well during emergencies as well.

Brindlee Mountain Fire Apparatus is one of the world's largest used fire truck sales and service companies. Based just outside of Huntsville, Alabama, the company has forty-five full-time personnel occupying over 12,000 square feet. Our mechanics, all of whom are EVT certified, perform pump tests, general repairs, preventative maintenance, and body, collision, and paint work on over 500 used fire trucks every year.
